Be  Ready Warrandyte

29 July 2013

New Website keeps Warrandyte in Touch

Up to the minute weather and fire information is now more easily available on the re-designed website of the Warrandyte Community Association (WCA).

One click on the Warrandyte Fire Watch button gives you local weather conditions from the Met Bureau and the current fire danger rating from the CFA. together with Vic Roads closures and alerts.

WCA President Dick Davies said the new layout makes both WCA news and 'Be Ready Warrandyte' fire information readily accessible on the front page.

"The popular fire video 'Do you have a fire plan?' and other fire links are also prominently and colourfully displayed."

The locally produced video, featuring local identities in the Warrandyte Theatre Group, has recently been screened at Municipal Association of Victoria and CFA meetings."

"The 'Warrandyte Community Emergency Preparation Planner' also summarises a lot of useful information on one page – including key phone numbers, links, household diary tasks."

Mr Davies said the website was upgraded by local website designer, Cameron Boyle. and provides information on local planning and development issues, sewerage and environmental issues.

"The Resources button lists submissions and media releases on a wide range of issues that WCA covers including preserving native vegetation, graffiti, petrol station plans and bushfire events," he said.

The WCA 'Be Ready Warrandyte' project was funded by the Victorian Government's Fire Ready Communities Grants Program. Manningham Council, Nillumbik Council, the Warrandyte Community Bank and the Community Market Committee have also provided funding support.

The website is available on www.warrandyte.org.au/fire .
